

FOR IMMEDIATE RELEASE

Envistacom to Demonstrate Fully Integrated Secure Passive Optical Network Solution at BICSI Winter Conference

TAMPA, F.L. (January 20, 2013) – **Envistacom** – an expert in the design and engineering of standard and secure Gigabit Passive Optical Network (GPON) networks – has assembled a partnership of industry-leading companies to provide a complete Secure PON solution for enterprise and government customers. The solution will be introduced at the **BICSI Winter Conference** Jan. 20-24 in Tampa, Fla.

“Our Secure PON solution provides voice, video and data to the desktop at gigabit speed at half the cost of active Ethernet,” said Clint Ashby, Director of Network Solutions at Envistacom.

“In today's corporate and defense environments, reliable, scalable and secure communication networks are more important than ever,” Clint Ashby said. “Our modular approach offers quick and easy setup and changes to networks and infrastructure, while providing significant savings in both initial capital outlay and ongoing operational expenditures. In addition, PON technology consumes less power and saves on cooling costs and space requirements, making it a smart ‘green’ investment.”

Envistacom specializes in all facets of the network including design, installation, testing, operations and maintenance. The company has teamed with **Zhone Technologies** and **Tellabs** to offer high performance, high density optical LAN for the commercial enterprise and government markets. Both solutions deliver state-of-the-art data, voice and video services on one platform, with network infrastructure security provided by **Network Integrity Systems**. **Trusted Systems**, provides physical security containers as an affordable, modular alternative to secure datacom room build-outs. The solution comes together with modular interior designs from **Commercial Design Services**. The entire bundled solution is available through **WESCO/CSC**, serving as the distributor.

Visit Envistacom at **BICSI** exhibit booth #532 for a demonstration of fully integrated Secure PON solutions for both industry and government. For more information, visit www.envistacom.com/SecurePON

About Envistacom, LLC

In today's corporate and defense environments, reliable and secure communication networks are more important than ever. Envistacom provides solutions across all facets of satellite, fiber, and wired/wireless networks including design, installation, testing, operations and maintenance. Across the globe, the firm supports customers' critical networks ensuring high reliability and security.
